Emilia Varonen

Profile

I'm passionate about evolving the interaction between people and technology! I enjoy all kinds of fun visual work and I dream on acting as an interpreter between users and developers, constantly learning new things from both worlds.

Work experience

Designer, THL 1.2.2022 - Current
I am mainly working on a project which is part of Next Genaration EU (Recovery and Resilience Plan) -project. Within it I'm familiarizing myself with the FHIR standard and collaborating with application developers and with experts from Kela and THL in the subject areas of Kanta PHR. I am also participating in THL's EHDS work, particularly in tasks related to the primary use of data

Project assistant, THL 12.7.2021 - 31.1.2022
I participated in the conceptualization of the further development of THL's Well-being Information and Personal Data Repository. I planned and organized workshops for well-being app providers and healthcare professionals with my colleague. I analyzed the results of the workshops and made recommendations for the concept

College intern, THL 12.4.2021 - 11.7. 2021
I participated in the writing process of THL's Directive 6/2021 and prepared the essential requirements for well-being apps, especially in regards to the accessibility requirements

IT-Crew Student ambassador, University of Jyväskylä 15.2.2019-13.4.2021
I planned and implemented the IT faculty's social media content, web page advertisements and event posters
according to the brand of the University of Jyväskylä. I was also part of the faculty's podcast team where I took
part in writing the podcast's scripts, recordings and transcribing process after the recordings. In addition to these
I innovated support groups for studying and remote group work for students at the beginning of the coronavirus crisis and led these meetings.

Education

Information systems science, Master of Economic Sciences
University of Jyväskylä | 1 / 2023
I wrote my Master's thesis on the system acquisitions of Kanta services and Kanta's connectivity to open data ecosystems.

Student exchange
University of Maribor | 2-6 2022

Information systems science, Bachelor of Economic Sciences
University of Jyväskylä | 2020
I wrote my bachelor's thesis on the usability of Finnish social and healthcare information systems
